Bay Area Open Minds

Looking for an open-minded psychotherapist who affirms your sexuality or gender identity?

Mission Statement

We are a group of San Francisco Bay Area, California psychotherapists and psychotherapy students who affirm that sexual and gender diversity are natural expressions of the human experience.

We provide a safe haven for mental health professionals to gather, network, support, and consult.

Our psychotherapy practices welcome and serve:

- Clients who engage in consensual sexual behaviors, including but not limited to kink and polyamory.
- Clients who are gender variant.

Our group welcomes:

- Students seeking mentorship in working

affirmatively and responsibly with said clients.

- Professionals seeking networking, support, and consultation in working affirmatively and responsibly with said clients.

We are committed to expanding positive psychological understandings of sexual and gender diversity, and to counteracting the historical and present day harm done by pathologizing diagnoses, stigma, and invisibility.

We are committed to identifying standards of culturally competent care and to sharing this information with each other and our colleagues so that we may better serve our clients and their communities.

We have all agreed to abide by the ethical guidelines of our respective disciplines.

Speakers Bureau

Our Speakers Bureau has professional psychotherapists and counselors who can provide presentations and workshops on sexual and gender diversity to your organization, institution, agency, or business.

For more information please email us at:
